

Broadvox Announces SMB IP Multimedia Communications Delivered with Grandstream Networks

*Grandstream GXV3140 First IP Multimedia Phone Combined With Broadvox GO! SIP Trunking
for Real-Time Video and Voice Applications*

Dallas, TX (PRWEB) 07.07.10. Broadvox, recognized as a leader in the VoIP industry for almost a decade, announced today that Grandstream Networks' new GXV3140 is the first IP Multimedia CPE device to deploy with Broadvox GO! SIP Trunking. Together, these two industry leaders will enable Small to Medium Businesses (SMBs) and enterprises to extend the value of IP Communications by easily adding video and telepresence throughout their organization for improved productivity, enhanced decision-making, and reduced travel costs.

Broadvox GO! SIP Trunking enables businesses to save up to 70% a month over their previous TDM systems. Along with that, they also receive the added benefit of using and exploring additional features and functions available with SIP. The Grandstream GXV3140 IP Multimedia Phone makes it easy for businesses to enjoy these cost-savings, and add video and multiple features to their calls with just one plug-in step.

“Grandstream has developed a true multimedia product to enhance enterprise communications, reduce costs, and strengthen our customers' network return on investment,” said Sergey Galchenko, Chief Technology Officer at Broadvox. “By incorporating video, a web browser, RSS feeds, IM with Yahoo, MSN, and Google, along with music/video streaming, this powerful desktop productivity device and Broadvox's SIP Trunking deliver a truly complete IP communications system for businesses looking to enhance their network with cost-effective video and telepresence, but also anxious to explore the more advanced functions of IP communications.”

“Broadvox enhances visual communications offered with Grandstream's IP Multimedia Phone by assuring premium quality video and voice IP calls that are reliably delivered to every customer, every time,” stated David Li, CEO of Grandstream Networks. “Together, Broadvox and Grandstream bring a compelling value proposition to the SMB and enterprise telephony market which delivers telecom cost-savings, improves the quality of their communication, and enables greater productivity through video conferencing and other built-in tools.”

Broadvox SIP Trunking coupled with Grandstream's GXV3140 offers a flexible, affordable, and easy-to-use multimedia communications solution for businesses that just beginning or well on the way to a unified communications environment. Broadvox SIP Trunking solutions are delivered on a private network designed with state-of-the art-equipment, enabling customers to benefit from SIP regardless of their existing infrastructure. Broadvox GO! SIP Trunking offers unlimited local calling, discounted long distance, and Toll-free calling. Additional DID's, Local Number Portability, and other options are also available. The network is monitored 24x7 and delivers service to the United States (excluding Alaska), Puerto Rico, US Virgin Islands, and Canada.

The first multimedia CPE endpoint used with Broadvox GO! SIP Trunking and the GXV3140 enable video and voice calling upon installation. With a 4.3" digital color LCD screen, the "always-on" GXV3140 has an integrated web browser which gives convenient, one-touch access to personalized RSS feeds of real-time online information services (news updates, stock updates, weather forecasts, directory searches, etc.), and thousands of Internet radio stations. This device also lets the user IM with Yahoo, MSN, and Google, and gives access Yahoo Flickr web photo albums. It comes equipped with an alarm clock, calendar, games, and music ringtones. Full duplex speakerphone and voice codec support deliver best-in-class telephony features. To explore all the ways to stay connected using the GXV3140, view this brief video:
