Santa Clara, California-based [Ketera Technologies](#)<sup>2</sup> announced today that its Ketera Supplier Content Management (KSCM) solution has been certified on the SAP NetWeaver platform, thus achieving the “Powered by SAP NetWeaver®” certification.

The elegance of KSCM lies in that it is offered as an on-demand solution (SaaS) and is probably the most comprehensive suite in its class vis-à-vis most of its competitors that offer only piece-meal solutions. KSCM combines hosted spend management applications with additional services, including hardware infrastructure, project resources, solution upgrades, supplier enablement, and system administration.

We can’t wait to see KSCM integrated with and/or certified on Oracle’s Fusion middleware. Recall, Hyperion Solutions customers who subscribe to Ketera’s hosted spend management system can receive its analytics through Hyperion’s business intelligence dashboard. Hyperion is now part of Oracle and we believe it is only a matter of time before a Fusion-KSCM announcement is made.
